THE IMPORTANCE OF

INVESTING IN CARE FOR PEOPLE WITH

Multiple Chronic Conditions

COMMON CHRONIC CONDITIONS

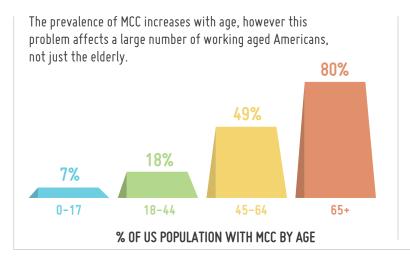

Patients with multiple chronic conditions (MCC) have two or more chronic illnesses at the same time. Chronic conditions include both physical and behavioral health conditions that last a year or more, and require ongoing medical care and /or limit physical abilities.

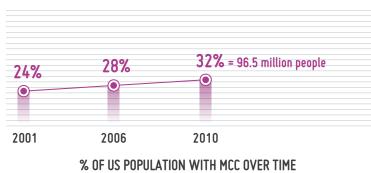

MCC IS A LARGE & GROWING PROBLEM

Almost one in three Americans lives with MCC.

The problem is growing and will continue to grow as the population ages.

THE PROBLEM IS COSTLY

71¢ of every dollar of US healthcare spending goes to treating people with MCC.

93¢ of every dollar of Medicare expenditure goes to treating people with MCC.

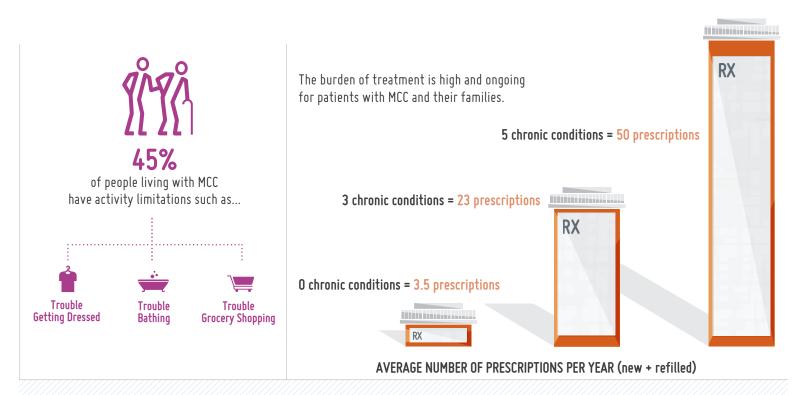

Out of pocket healthcare spending increases for patients with a greater number of chronic conditions.

O MCC = \$215

3 MCC = \$1,035

AVERAGE ANNUAL OUT OF POCKET EXPENDITURES

IMPACT OF MCC ON PATIENTS & FAMILIES

To address the growing problem of MCC, the US healthcare system must transform from a disease-specific model to a patient-centered one.

The Agency for Healthcare Research and Quality is investing in MCC initiatives, **but everyone's help is needed!**
